

## **PRESS RELEASE**

### **Mania Belgium appoints Scanditron Danmark as its agent in the Nordic and Baltic countries and Poland.**

Mania Belgium NV – in the past known as Barco – announces the appointment of Scanditron Danmark A/S as its agent in the Nordic countries, the Balticum and Poland to promote their entire product range.

Mania Belgium will directly support the UCAM software and the SilverWriter and older Barco plotters, both by Hot Line Support from Ghent in Belgium and as field service intervention at the customer's site. The on-site service will be performed by one of the Mania Belgium service engineers, as all of them have many years of experience on these products.

Mogens Medegaard, Managing Director of Scanditron Danmark A/S, states: "We have had a long good relationship with first Disc followed by Barco ETS Division and then later with Mania, and it is a pleasure now to be back to the core business as the former Barco ETS Division was known and respected. We are looking forward to promote sales in a much bigger territory than in the past. We are sure the customer will receive this message as a proof of commitment to the PCB market and make it obvious that Mania Technologie products are the right choice in continued and new developing business.

Karel Tavernier, Managing Director of Mania Belgium NV comments: "We are delighted to be working in partnership with Scanditron. Not only are they well respected, but their other products are complementary to our plotters and software.
