

Gent Belgium / Taipeh, Taiwan, 12-Nov-2008

**Ucamco (formerly Barco ETS) from Belgium appoints Eastek as distributor in Taiwan for their full range of products.**

Ucamco (formerly Barco ETS) and Eastek announced today that the two companies have signed an agreement under which Eastek will become distributors in Taiwan for Ucamco PCB photoplotter products as well as their CAM software.

Eastek already was a distributor for Ucamco's software products. Now Eastek will add Ucamco's **SilverWriter** and **calibr8tor** series of laser photoplotters to the full **UCAM** family of front-end software, the **integr8tor** PCB sales solution and the recently introduced **SmartPlate** software for reliable plating.

Scott Lin, President of Eastek, explains: "We have had an excellent collaboration over the last year distributing and supporting their powerful **UCAM** and **integr8tor** software. We are delighted to be able to add the world-beating **SilverWriter** and **calibr8tor** photoplotters to our portfolio of products. Their combination of high accuracy, high speed and competitive pricing make them an ideal complement to our range of automated front-end tooling solutions."

Eastek will take over existing hardware and software support engineers from Mania Taiwan Ltd. and will carry a local stock of spare parts. To safeguard the interests of existing customers and protect their investment, Eastek will offer to take over the maintenance contracts and warranty obligations.

Karel Tavernier, Managing Director of Ucamco, adds: "We look forward to continuing and expanding our collaboration with Eastek. Their automation expertise will ensure that our customers get the maximum benefit from the synergy between our hardware and software products. At the same time their respected position in the Taiwanese market will introduce our photoplotters to new high-profile customers."

**About Eastek:**

Eastek has been operating in Taoyuan Taiwan since August 1998. Initially set up to develop electronic testing software, today Eastek is recognized as a market leader in the development of planning systems for both rigid and flexible circuit manufacturers.

We are dedicated to the pursuit of technological innovation to meet the demands of the global market and the needs of our customers. Our mission is to use our knowledge of market needs and our experience and expertise in PCB software solutions to become the partner of choice for global electronic manufacturing companies.
