

PRESS RELEASE.

Ucamco announces the release of Integr8tor v4.1.2

Ucamco (formerly Barco ETS) have launched version 4.1.2 of their Integr8tor automatic data input and analysis tool.

Integr8tor is a powerful tool to enhance customer relations and increase front-end throughput by up to 30%. Its automatic data input and design analysis capability provides the job parameters needed for fast, accurate quotations and for higher throughput through the front-end tooling process.

The latest release brings a number of new interesting features and offers improved performance and stability.

Integr8tor runs equally well in a Ucamco UCAM or Frontline Genesis environment.
