

## Elmatica installs a second Integr8tor workflow

**Gent, Belgium - May 10th, 2017** - Printed Circuit Broker Elmatica, are not only experienced when it comes to printed circuits, they are highly qualified and value predictability. As a trusted partner in the Medical-, Defense-, Automotive-, Automation-, Civil Aviation-, Energy- and Telecommunication-industry, Elmatica keeps track of the entire purchasing process from consulting, designing, material selection, manufacturing selection, production monitoring, logistics and claims handling. In order to support these processes Elmatica recently installed a second Integr8tor workflow.

Handling more than 12 000 RFQs per year, Ucamco's Integr8tor enables Elmatica to work around the clock, receiving and analysing their clients incoming design data and allowing to serve them better with more accurate, faster quotes than ever before. With over 45 years experience in the industry, Elmatica has a unique understanding of the market by procuring on four continents and delivering to five.
