

Graphic Plc chooses Ucamco's Integr8tor

Crediton, UK - August 26, 2014 Following an extensive evaluation period, Graphic Plc has chosen to fully implement Ucamco's Integr8tor tools for her automatic customer data input and analysis software.

Integr8tor creates comprehensive analysis reports that will be linked to Graphic's quotation system PCP from Softwires Ltd. Another major advantage is the automatic creation of a "ready" Cam job that increases consistency to Graphic's data input channel and allows Graphic to highlight any data or DFM issues and to respond to her customers.

During the evaluation the "tailoring" of Graphic's special requirements has already started. Included in the Integr8tor project at Graphic is a further development of additional tools that will expand the capabilities over the next few months.

About Graphic Plc

Graphic is one of the most technically competent manufacturers of high-technology printed circuit boards. With headquarters located in the heart of the English countryside, Graphic focuses on leading edge technology released to the most demanding international quality standards. Constantly looking at innovative solutions to customer requirements. Graphic is an expert at prototyping and developing new "first to market" products. With facilities in the UK, United States, Denmark and in China for medium to large volume production, the Graphic Group is able to offer the complete service from Application Engineering support to volume PCB manufacture.
