

Release notes for Ucamco's Reference Gerber Viewer v1.5

List of updated features:

- Multilayer support.
 - You can now visualize multiple files simultaneously.
 - This is important to view files in PCB fabrication data.
- Improved security
 - HTTPS protocol
 - Cleanup of inactive server sessions (after closing the browser, closing the browser tab, after reloading)
 - Automatic logout after 50 minutes of inactivity
 - The uploaded Gerber files are deleted after session termination
- Support for the new commands AB, LM, LR, LS (nesting of blocks)
- Miscellaneous
 - Support for all file extensions.
 - Error message when the uploaded files contain non-Gerber files.
 - Improved stability.
 - Bug fixes
