Paneliz8tor has been successfully used for many years.

Mainly designed with flexible PCBs in mind but the advantages can be used with all other PCB types too.

For example:

- Optimal usage of material even with irregular shapes
- Saving of personnel resources in every part of production
- Shortening of the cycle time for small orders
Paneliz8tor

- Simple way to combine different jobs on one panel
- Can use existing PanelPlus configurations
- Free choice of rotation angles
- Fast overview to choose the optimal Panel for each job combination
- Direct modification of the values for angle, clearance, type and number of PCB’s and immediate recalculation of the panels
